Cover Letter

To whom it may concern,

I am writing to apply for the position of Python Developer at i2C. With two years of experience as a Software Engineer, I believe I have the right combination of skills and knowledge to make an immediate and positive contribution to your team.

My current role as a Software Engineer involves developing Cognitive Assessment Technology for a Neurological Performance Measurement Platform. I have developed a range of features using Python, with a strong focus on automation and robustness. I have also worked with Linux and other open source technologies. Furthermore, I have the ability to work in a team environment and communicate effectively in English.

My academic background in Computer Science, combined with my professional experience in engineering, software development, and Python, make me a great fit for this role. I am confident that my skills and experience will add value to your team and help i2C continue to be a leader in the industry.

I am excited to learn more about the Python Developer role at i2C and to discuss how my qualifications and experience could benefit your organization. Thank you for your consideration and I look forward to hearing from you.

Sincerely,

UbaidUllah Yousaf
